RECORDS FROM ERECH
TIME OF NABONIDUS

INTRODUCTION.

Two hundred and forty-six texts of the Yale Babylonian Collection, dated in the reign of Nabonidus (555–538 B. C.), are published in this volume. Nearly all that are fully dated mention Erech or its environs as the provenance of the documents. Only a few are dated at Babylon, Borsippa and Larsa. It is evident that, as a whole, they are a part of the temple archives of Erech, the personal names in the texts being additional proof of this.

With few exceptions they are in a fine state of preservation, though varying much in size and color. Seal impressions are rare (See Nos. 33, 154, 239, and 241), and there is only one instance of an Aramaic Endorsement, No. 164. The volume of business that was transacted in the ordinary routine of temple life is indicated by numerous promissory notes, receipts for money and agricultural products, rentals of sheep and cattle, leases of land, provisions for bailment, financial inventories, legal decisions, etc.

An interesting feature of these records is the fact that certain kinds of documents predominate in the first part of the reign of Nabonidus, and other kinds in the second part. Thus in the first seven years there are numerous tablets recording obligations to pay tax to *Šum-ukîn*, the son of *Bêl-zêr*, who was in charge of the tax receipts of the temple. Such records are absent in the remaining years of the reign. All the leases of land, with one exception, are found in the first four years. In the latter part of the reign bailments and similar documents predominate. This seems to indicate that tablets in the temple archives were systematically arranged primarily according to subject matter. Naturally, if we had access to all the legal documents of the reign of Nabonidus belonging to Erech, we would find tax notes, leases, bailments, etc., evenly distributed through all the years. But a few hundred tablets from a section of the archives would present the above phenomenon if they were arranged in the order suggested.

A chronological study of the scribes who wrote these documents suggests that a certain number of new scribes took up the work each year. Those years credited with a large number of tablets from which to gather data present from four to eight new scribes not appearing in any preceding year. In the other years the new scribes range from one to three. It seems, then, that there was a yearly induction of scribes

into office. *Nádinu*, the son of *Bêl-ahê-iquša*, son of *Egibi*, was an unusually expert scribe, as his exact and beautiful writing proves. We are not surprised, therefore, to find that he has by far the largest number of tablets to his credit and that they range from the third to the seventeenth year of the reign of Nabonidus. This is all the more noticeable because few of the more than three score scribes of these texts have a larger range than one year.

Nos. 71, 72, 103, 131, 150, 155, 225, 232, and 233 show that Belshazzar, the son of Nabonidus, had much to do with the administration of affairs at Erech. There is evidence that he took an interest in the use of the religious paraphernalia of the temple and that he paid a tithe of the sheep which were in charge of his shepherd. Some of the sheep belonging to the temple were under his jurisdiction, as their disposal depended upon "the command of the son of the king," or "the order of Belshazzar, the son of the king." No. 150 is especially interesting in that it contains the record of a carefully drawn-up lease of land granted by Belshazzar. The rent to be paid was 5,000 measures of barley and 3,000 bundles of straw. Nos. 225 and 232 show that Belshazzar was placed on an equality with Nabonidus in oaths at Erech. See *Expository Times*, Vol. XXVI, 297-299, for a similar text. In spite of the exalted position of Belshazzar he was still subject to the commands of his father, as is indicated by No. 103:3.

No. 10, dated at Larsa in the first year of the reign of Nabonidus, records a series of commands with reference to temple practices in Erech. Two commands require that the custom of the time of Nebuchadrezzar be followed. A noteworthy feature of the tablet is that lines 3, 6 and 7 contain blanks where names have not been written, although the usual determinatives, etc., have been inserted. This may indicate that the tablet is a copy of a former one upon which the names had become obliterated. Perhaps the original tablet remained in Larsa and this tablet may have been a copy made at a later time in the reign of Nabonidus, when a restatement of the commands was necessary because of some controversy as to the exact regulations that were to be maintained in the temple at Erech. In all probability certain practices had been neglected and an effort at reform was being made. To bring this about, the weight of precedent was utilized. Nebuchadrezzar's name still had a potent influence and the temples at Babylon and Borsippa, namely, Êsagila and Êzida, were regarded as models of ceremonial orthodoxy. It is easy to suppose that this reform in the activities of Êanna may have been part of a general toning up of the religious situation in the nation, due to the accession to the throne of a king of some individual character and purpose in comparison with the weak rulers who were his immediate predecessors. The daughter of the king, mentioned in line 22, suggests *Bêl-šalti-Nannar*, whom

Nabonidus dedicated as an *entu* to the temple of Nannar or Sin at Ur. See *Miscellaneous Inscriptions in the Yale Babylonian Collection*, No. 45, page 66.

No. 222 gives further insight into the regulations of Êanna. We are furnished with the picture of a man bringing an offering to the temple for the festal meal of Ishtar, the goddess of Erech. The bearer of the offering, whether purposely or inadvertently, failed to enter the temple in a reverent manner, i. e., he omitted bowing at the place where he entered. This omission on his part caused summary action by the temple authorities. The culprit was cast into chains and the offering which he had defiled by his action was debarred from use in the temple by being sealed. This text gives sufficient proof of the value attached by the Babylonians to an act of homage upon entering a temple.

A number of texts throw light upon the extent and splendor of the paraphernalia used in the temple. No. 117, which mentions 703 gold stars, etc., gives a glimpse of brilliant ornaments. The weaver, goldsmith and worker in precious stones had ample opportunity to display their skill in producing the vestments and articles of adornment required in the elaborate ritual of the temple. Nos. 71, 72, and 229:26 furnish evidence that the paraphernalia of one temple might be taken to another as occasion required:

The *širqûtu* has been recognized as a class of temple subordinates connected with various Babylonian deities and responsible for the performance of work. Nos. 2, 56, 57, 79, 80, 116, 126, 129, 154, 186 and 224 deal very fully with the *širqûtu* of the Bêlit of Erech. There is one reference to a *širqu* of Nergal, No. 148:3.

From these texts we learn that the *širqûtu* represented an order of men and women that had been presented to the deity, as the verbs *šarâqu*, *nadânu* and *zakû* indicate. Parents could dedicate their children, and civilians and princes their slaves. As far as we know the act of dedication was voluntary and may have had some religious merit. A master could dedicate his slave to the deity and still have some control over him, e. g., could sell him. The temple authorities could place members of the *širqûtu* at the disposal of an outside individual different from the person who had dedicated them. Two classes of the order seem to be indicated, one marked or branded with a star and the other unmarked. The *širqu* marked with a star belonged to the deity for life and this apparently affected his offspring's status to at least the third generation. In cases of doubt the status of an unmarked *širqu* was determined by reference to the records, the temple record taking precedence over any other. On the other hand the symbol was sufficient to determine the status of a branded *širqu*. A slave could go security for a *širqu*. If the *širqu* disappeared, the slave became a *širqu* in his stead. The *širqûtu* was on an equality with the common class of artisans

This did not prevent a *širqu* from assuming commercial obligations (See No. 150). The temple had vast land holdings and the *širqûtu* may have afforded a means of augmenting the number of workmen that could be relied upon.

Of parallel interest with the *širqûtu* is the fact that animals belonging to the temple were similarly marked with a star. See Nos. 11, 123, 131, 150, 156, 169, 231, and 233.

The verb *šamātu*, which underlies the expressions *aš-mit*, *iš-mi-it*, *i-šim-mi-it*, *i-šim-mi-ti*, *i-šim-mi-tum*, is used to denote the act of marking men and animals with a star. The mark itself is styled *šin-du*, *še-en-du*, a nominal form related to *šimtu*. *ŠE-TU* (Brünnow No. 7499), equals *šimtu*. Brünnow No. 225 shows that this same ideogram referred to *šindu* and was used in connection with the ideogram for "skin." This adds weight to No. 79:15 and No. 80:15, where the phrase *ina eli širrit-ti-šu* refers to the hand as the part of the body that was marked, in these instances the verb *nadû* being used to denote the act of marking. That *kak-kab-tu še-en-du* must refer to an implanted star is indicated by No. 120:4 of *Babylonian Inscriptions in the Collection of J. B. Nies*, Part I, where the phrase *MUL-ti še-en-di* is found. The fact that Ishtar's symbol was a star shows that it was an appropriate sign of ownership.

The principle of bailment was well developed in Babylonian law. Nos. 60, 64, 108, 119, 147, 152, 153, 163, 165, 175, 191, 194, 200, 206, 213, 219, 221, 230, 234, and 241 give interesting examples of this legal procedure. Extreme care was taken to protect the claim (*ra-šu-tu*, *ri-e-ḫu*) which the temple or an individual had against a person. Those who acted as bondsmen suffered severe penalties in case of failure to perform their obligations. The idiom *rêšu našû* is used in these texts in the sense of *erêšu*, "desire." Compare 147:4, 191:14, 206:5, 6; 213:7, and 234:7.

Nos. 122 and 148 intimate that fish formed a part of the sacrifices offered in Êanna. This connects itself with the fact that one of the signs representing the goddess Ninâ was originally a fish in an enclosure. Sacrifices of fish in Ishtar's temple in Erech would point to an ancient conception of Ninâ or Ishtar as a water deity.

No. 168 gives some of Erech's distant sources of metals and minerals, copper and iron from Ionia, iron from Lebanon, and precious stones from Egypt.

The deity ^d*En-sa-na-aš-ru* is mentioned in No. 145:1, 4, 5, 20. If *en(n)a* means "speak" (See *American Journal of Semitic Languages*, July, 1918, page 284), the possible reading of ^d*Amâtsa-našru* is suggested, on the analogy of ^d*Ušur-amâtsu*.

No. 226, dated in the thirteenth year of the reign of Nabonidus, is a further example of the fact that special sacrifices were offered upon the 7th, 14th, 21st and 28th days of the month. See *Miscellaneous Inscriptions in the Yale Babylonian Collection*, Nos. 45-51.

NAME INDICES.

Abbreviations: b., brother; d., daughter; f., father; gf., grandfather; gm., grandmother; gs., grandson; h., husband; m., mother; s., son; w., wife; YBC., Yale Babylonian Collection.
